Lutavit® Calpan

Lutavit® Calpan from BASF is a great source of pantothenic acid or vitamin B5. It plays a crucial role in the metabolism of fats, carbohydrates and proteins in animal nutrition. This high-quality product is suitable for feeding various livestock, including poultry, ruminants and aquatic animals. Vitamin B5 deficiency can result in skin and mucous membrane problems, poor feed utilization, diarrhea and hormonal and neurological disorders.

Lutavit® Calpan provides high stability, no dust generation and good solubility in feed mixtures. It adheres to global standards and improves metabolic function and growth in animals.
